

Electronic Health Record

Enhance quality, productivity, and patient outcomes with Care360 EHR.

Keep your practice on solid ground with a cloud-based EHR.

Experience a robust solution that offers dynamic access to key patient information anytime, anywhere. Quest Diagnostics Care360® EHR offers a comprehensive, fully-mobile and secure EHR that helps keep medical practices efficient and profitable.

Streamline practice workflows with full encounter documentation, electronic lab ordering, and ePrescribing.

Utilize secure mobile access via our iPad®, iPhone® and Android applications that harmonize with your dynamic workspace.

Experience our growing network, which serves nearly half of the physicians and hospitals in the U.S. with solutions that touch the lives of over 30% of American adults every year.

Share critical patient information easily and securely with others in the DirectTrust accredited network.

Facilitate secure patient and physician communication with the integrated MyQuest™ Patient Portal.

Deploy award-winning, affordable solutions quickly with our intelligent approach to implementation, designed to fit the evolving needs of your practice.

Enjoy 24/7 U.S.-based customer support with our team of dedicated professionals, who are available when you need them.

Have confidence in our IT solutions, built on advanced, cloud-based architecture with redundant back-up.

Care360 EHR • Advantages

Enjoy Enhanced Connectivity

Send patient information using industry-standard formats, accept information from other providers, and access extensive patient lab histories to help optimize care. With access to more than 440,000 physicians in over 130,000 locations, the Care360 network is the recognized standard for fast, efficient, and powerful healthcare connectivity.

Experience Secure Mobile Access

Access critical clinical information outside of your office. Care360's cloud-based platform, along with our iPhone®, iPad®, and Android applications, untethers physicians from a physical location. At home, at a coffee shop, or in response to an emergency call, physicians, and other clinicians can securely access and act on patient information from virtually anywhere.

Enhance Patient Communications

Connect with your patients using the Quest Diagnostics MyQuest™ patient portal. Securely send messages regarding treatment plans, follow-up testing, medications, and more. Allow patients to view and share their health information while satisfying Meaningful Use requirements.

Support Practice Workflow

Efficiently manage your practice with an electronic system that adapts to your unique environment. Experience intuitive user interfaces that help you transition your clinical workflows seamlessly, accurately, and securely.

Proactively Improve Quality

Care360 EHR allows for tracking and benchmarking of clinical quality measures and access to real-time scorecards that help evaluate and identify improvement opportunities.

Avoid CMS Penalties

Care360 EHR is ONC certified and can be used to satisfy the EHR technology requirements of the HITECH Act and its Meaningful Use provisions as well as Physician Quality Reporting Initiative (PQRI) incentives.

“One factor that influenced our doctors to choose Care360 EHR was that Quest Diagnostics was behind it. It's available online from anywhere. I can check prior lab results, MRIs or my notes and make clinical decisions very fast.”

-Dr. Paulo Andre, MetroWest Medical Center, Framingham, MA
